

POULTRY FACTS

IDEAL HOUSE FOR CHICKENS
Wherever Possible Building Should
Have Southern Front—Fresh Air
and Sunshine Help.

Plenty of fresh air and sunshine,
along with freedom from drafts and
dampness, are the requisites of the
ideal poultry house, yet there are
many poultrymen who build expen-

House With Open Front.

sive houses for their fowls without
giving a thought to the real needs of
the hen. Nothing plays a more im-
portant part in regulating the condi-
tion of the house than does location.
Wherever possible the house should
be built on a southern slope and it is
better if there is some protection, as a
grove of trees, to the north. This will
give the house plenty of sunlight dur-
ing the greatest possible time and will
also protect it from the cold winter
winds.

GET EGGS AND MEAT FROM KITCHEN WASTE

(Prepared by the United States De-
partment of Agriculture.)

In every household, no matter
how economical the housewife,
there is a certain amount of table
scraps and kitchen waste
which has feeding value, but
which if not fed, finds its way
into the garbage pail.

Poultry is the only class of do-
mestic animals which is suitable
for converting this waste material,
right where it is produced
in the city, into wholesome and
nutritious food in the form of
eggs and poultry meat.

Each hen in her pullet year
should produce ten dozen eggs.
The average size of the back-
yard flock should be at least ten
hens. Thus each flock would
produce in a year 100 dozen eggs
which, at the conservative value
of 25 cents a dozen, would be
worth \$25.

By keeping a back-yard poultry
flock the family would not
only help in reducing the cost of
living but would have eggs of a
quality and freshness which are
often difficult to obtain.

Remember that eggs produced
by the back-yard flock cost very
little, as the fowls are fed largely
upon waste materials.

EARLY HATCHING IS DESIRED

It will Increase Number and Size of
Fowls and to Farmer It Means
Much Larger Profits.

(Prepared by the United States De-
partment of Agriculture.)

To the country at large early hatch-
ing by every chicken raiser means
much. Early hatching will increase
the number and size of fowls and the
number of eggs produced next year.
It will mean bigger birds and birds
that will lay in the winter months.
To the individual farmer it means
more profit. He will get more chickens,
as a larger proportion will live; he
will get more actual meat, not only be-
cause more will live but because his
chickens will be larger; and he will
get more eggs, when eggs are scarce,
for early hatched pullets will lay in
the winter.

The recognized importance of food
in the greatest war makes it seem that
the hen must take her place among
those who are helping to win it for the
forces of democracy. This place will
be an important one in proportion to
the response this year to the call for
increase chicken and egg production.
The hen, of course, always has shown
a willingness to do her duty, and
doubtless she is willing now. All that
is to be done is for her masters, the
farmers of the nation and the city
dwellers who are helping on a back-
yard scale, to make sure that the hen's
opportunity will not be neglected.

LIVE STOCK

KEEP YOUNG HORSE GROWING
Good Practice, When Not Carried to
Extremes, to Allow Colts to Rough
It in Winter.

(Prepared by the United States De-
partment of Agriculture.)

Colts that are kept growing make
the best horses. Some farmers allow
their young horses to "rough it"
through the winter and, although this
is a good practice when not carried to
extremes, if the feeder is not careful
it may give the colt a setback which
permanently retards its development.

Feeds that will promote growth
should be supplied. Good, clean clover
hay is palatable and slightly laxative.
Timothy hay commonly is fed. Well-
cured alfalfa hay free from dust is one
of the best roughages for growing, but
because of its relatively high protein
content it generally is economical to
supplement it with other roughage such
as timothy, mixed hay, or corn fodder.
Besides lending variety to the ration
such a method of feeding alfalfa would
offset any likelihood of kidney or
bowel irregularities. Shred oats can
be used to good advantage to suppli-
ment other roughage. The animals
should not be allowed to gorge them-
selves on dry feed. They should be
given only what they will clean up
readily, but at the same time enough
feed should be supplied. Oats, corn
and peas, preferably fed ground, are
suitable grains. Bran, oil meal or glu-
ten feed will add protein and lend vari-
ety. Cottonseed meal should not be
fed to foals. Appropriate grain rations
for the first winter are: Two
parts corn, five parts oats, three parts
bran and one part oil meal; or four
parts oats, one part corn and one part
bran.

Slugs should not be fed to foals to
any considerable extent. Sliced roots,
such as carrots and sugar beets, are
very palatable and have a cooling ef-
fect on the digestive system. The
quantity of feed generally should be
regulated by the appetite, although oc-

Splendid Young Fillies.

asionally the appetite may be too ra-
venous to be a good indication. The
general condition of the colt and the
droppings should be observed daily.
Usually not over one pound of grain
per 100 pounds of live weight should
be fed until the animal is two years
old. A liberal supply of salt and good
water and plenty of fresh air and exer-
cise are essential for the proper de-
velopment of young horses. Idleness
succeeding exercise will cause consti-
pation. It is often said that a horse is
made during his first winter. Certainly
this is a critical time in the animal's
life, and at no other age will proper
feed and attention do as much to make
of him a good horse. If stunted during
the first winter he never will gain
proper size and shape.

During the second winter the feed
and management should be nearly the
same as for the first winter, except
that the quantity of feed should be in-
creased somewhat, the colt tied up in
his stall and handled frequently. Exer-
cise by gentle and careful but firm
handling at this age will save later
much strenuous labor.

BOAR IN PROPER CONDITION

Good Judgment Is Necessary and Ex-
tremes Are to Be Avoided—
Vigor Is Essential.

It requires good judgment to keep a
boar in the best possible condition.
Extremes are to be avoided. The
over-fat boar is not satisfactory, and
a half-starved one cannot transmit
vigor and constitution to its young.

SALT FOR SHEEP IN WINTER

When Feeding for Lamb Crop It Is
Well to Remember That You Are
Feeding for Wool.

Sheep need a little salt winter as
well as in summer. Remember that
when you are feeding for the lamb
crop you are also feeding for wool.
A well-fed, well-nourished ewe will
shear a heavy fleece.

SOW'S FEED OF IMPORTANCE

Animal Requires Something Besides
Meal—Give Her Roots, Alfalfa or
Red Clover Hay.

As in the case of the boar, the
sow requires something besides meal,
and the furnishing of some such feeds
as roots, alfalfa or red clover hay, is
even more important than in feeding
the boar. Skim milk is also excellent
when it can be had.

GREEN-FORD AUTO CO.
Agents Greenville, Ky.

You know, of course, that the Maxwell Motor Car is the long distance champion
of the world.

You have read that a "stock" Maxwell 5-passenger car ran for 44 days and
nights without stopping the motor.

And that, in the 44 days non-stop test, the Maxwell covered 22,022 miles, at
an average speed of 25 miles per hour.

But have you, up to now, realized the full significance of that performance?

Do you know that no other motor car in the world has ever equalled or even
approached that performance?

In a word, did you take this test seriously when you heard of it?

Or did you set it down as a "selling stunt" to give the publicity man something
to talk about?

It's worth your while to read and to study the conditions under which that test
was made.

You know that the American Automobile Association (familiarily known as the
"A.A.A.") is the official arbiter of every automobile test and contest.

But perhaps you didn't know that when a maker places his product under A.A.A.
supervision he must do absolutely as told and abide by the decisions of the Board.
That's why there are so few A.A.A. Official Records!

This 22,000-mile Maxwell non-stop test was official from start to finish.

Therein lies its value to you.

It proves absolutely the quality of the car—of the very Maxwell you buy.

For verily this was a "stock" Maxwell. Listen:—

First: the inspectors disassembled the motor to see that no special pistons, valves,
bearing-metal or other parts had been used.

Every other unit was as critically inspected. Then the car was re-assembled
under their own supervision.

As we had much at stake and the test was made in winter (November 23 to
January 5) we asked permission to take certain little precautions against acci-
dental stoppage.

Sounds reasonable, doesn't it?

But they refused permission to do any such thing.

For example:—They would not permit a rubber cover over the magneto—it
wasn't "stock."

They refused to let us tape the ignition wire terminals—they are not taped on
the Maxwells we sell—so of course it wasn't "stock."

Neither would they let us use a spiral coiled pipe in place of the usual straight
one from tank to carburetor to guard against a breakage from the constant,
unremitting vibration—it isn't "stock."

Nor to use a special high priced foreign make of spark plug—the run was made
on the same spark plugs with which all Maxwells are equipped.

So rigid were the rules, we were unable to carry a spare tire on the rear—it
wasn't "stock." A telegram to headquarters in New York finally brought a
special permit to carry a spare tire.

"It isn't stock!" "It isn't stock!"

That was the laconic reply of those A.A.A. inspectors to every last suggestion that
called for anything but the precise condition of the standard, stock model Maxwell
that any customer can buy from any one of 3000 dealers anywhere.

We are glad now—mighty glad—that the rules were so strict and so rigidly
enforced.

Any other car that ever attempts to equal that record must do it under official
supervision—and comply with the same terms.

And it will have to go some.

For Maxwell set the standard when it performed this wonderful feat.

Maxwell complied with those rules—and made good.

Every drop of gasoline and oil and water was measured out and poured in by
the inspectors themselves. They would not even let our man pour it in!

Every four hours the car had to report at the official station for checking.

And it had to be there on the minute.

And every minute there was an inspector beside the driver on the front seat—
two more men in the rear. One got out only to let another in—day and
night for 44 days and nights!

There was one technical stop.

It is interesting to know the circumstances.

Dead of night—a driving storm—a cloudburst—suddenly another car appeared
in the road ahead.

In his effort to avoid a collision the Maxwell driver stalled his motor.

At least the observers thought it stopped and so reported.

The car did not stop, however, so its momentum again started the motor (if it
had indeed stalled) when the clutch was let in.

The contest board exonerated our driver on grounds that his action was neces-
sary to save life.

That shows you how rigid were the rules—how conscientiously applied by the
observers.

You who have owned and driven motor cars—you who know how small a thing
may clog a carburetor or a feed pipe; "short" a spark or stall a motor—will
realize what a wonderfully well made car this must be to go through that test
under those conditions—44 days—22,022 miles without stopping.

The exact amount of gasoline, of oil, of water used; the tire mileage, tire
troubles, tire changes; the distance and the routes are matters of official record,
attested under oath and guaranteed by the A. A. A.

(By the way, the average was nearly 10,000 miles per tire.)

Any Maxwell owner—or anyone interested may see those records.

And—here's the most wonderful part—though no attempt was or could be made
foreconomy; the Maxwell averaged 22 miles per gallon of gasoline.

Some other car may, some time, equal some one of those performances. But to
equal them all in the same test—that car must be a Maxwell.

The Following Organizations Are A Part Of The Artists Who Will Appear At Our Chautauque June 20-24.

Messrs. Smith and Holmes are composers well known in the musical world. Mr. Holmes wrote the march, "The Prospector," used as the official march at the St. Louis Fair, and played by a band of over eleven hundred musicians. Mr. Smith is a contributor to three leading musical magazines and writes both words and music for his songs.

HARPISTE

MISS MARIE McADOO

Miss McAdoo is often asked how she happened to study the harp. When quite a small child she heard a harpist, and his playing, and his beautiful golden harp made such a deep impression on her that from that day it was her ambition to study the instrument and have one of her own. There are very few harp teachers, and these are only located in the larger cities, so at an early age she began the study of the piano, and continued it until old enough to enter the Oberlin Conservatory, where she received her first harp instruction under William Kilgore Buchanan, a former student of the Paris Conservatory. Later she was coached under Loretta DeLone, who for six years was harpist of the Minneapolis Symphony Orchestra, and later she studied with Enrico Tremonti, first harpist of the Chicago Symphony. She has been associated with Mme. Ringdorph for several seasons and will play some solo compositions especially for the harp and also rearrangements of songs and music well known on other instruments.

MR. MONTAVILLE FLOWERS

Mr. Flowers is one of America's most conspicuous orators. Prominent in educational and political fields as well as the Chautauque world, he has achieved the highest possible success in presenting his message to the people. His "Rebuilding of the Temple," his latest lecture, is a study of the reconstruction of civilization after the world war; a fundamental discussion of peace and progress with special reference to the duties and policies of the United States in its relations with the world powers. Mr. Flowers is a master of oratory and with all the simplicity and zeal of the three sounds in behalf of the nation the alarm of war to arouse the citizens to a realization of the impending danger and the necessity for self-preservation and national defense. Mr. Flowers is president of the International Lyceum Association and presided over the sessions of the recent national conference of lecturers and Chautauque managers held in Washington and addressed by members of the cabinet, foreign Ambassadors and Government officials on all the phases of the war and what should be presented to the people in the Chautauques this season on that subject. Hear Mr. Flowers without fail at the Chautauque.

MME. LILLIAN RINGSDORF COMPANY

Mme. Ringdorph is well known in the concert field and on the Chautauque platform. Her charming manner, soprano voice of wide range, and perfect quality, and her magnetic personality make her a primo favorite wherever she goes. Miss Marie McAdoo, pianist and harpist, is a musician of rare ability. She will play solos composed especially for the harp, and will also appear in duets and trios with the other members. Mr. R. P. Horspader is a baritone of ability and dramatic presence. He sings of popular and classic. Hear them at the Chautauque.

You can get any other machine you want, at any time, but you will keep the Victor forever, when you get it. Better than for anyone you want, and what is more, people all over the world want it. Deliveries are being made daily. Roark expects liberal shipments soon, or orders placed many months ago.

Large stock of records at Roark's. Small prices.

Golden Star furniture polish, best made, at Roark's.

Indecision.

I hired Pete Dill to slay a cat whose ways were full of error; it howled weird songs around my flat and made the night a terror. I said Exterminate the brute and here's a silver quarter; I care not if you drown or shoot or bray him in a mortar. Next night the cat was still on deck, with songs of home and mother; it made my nerves so dire a wreck I knew not which to do. I hunted up old Pete Dill and said, "You are a quitter! Why don't you hang yourself and kill that cheap misguided critter?" "I can not quite make up my mind," he said "how best to do it; I do not want to go it alone and botch the job, besides it is too dark here where the billows roar I thought I would endeavor, but then perchance she'll swim ashore and be as bad as ever. I thought I'd shoot her with a gun, but saw that was improper; the noise would startle every one and maybe bring a copper. I thought I'd hang her to a tree, but that seems rather brutal; the plans which have occurred to me so far seem punk and futile." It is no wonder, Peter Dill, I said that you are blasted; the way you yaw and back and fill would make a man disgusted. Your pants are patched before, behind; your coats is all in tatters because you can't make up your mind upon the smallest matters. I'll give the job to William W., I'll pay him half a dollar, and he will take the nearest ax and crack that midnight squaller. WALT MASON.

Right in your home you can have the greatest concert in the world, for on your Victrola you can command greatest artists, from Abbott to Zimbalist, to sing, play or speak for you. Call at Roark's and arrange for one of these instruments.

Roark's, Greenville, Ky.

Nation-Wide Preparedness

North, South, East, West—all working to put the Nation in fighting trim!

Army and Navy departments and districts, camps, yards, coast-guard stations, light houses, munition, construction and textile plants—all co-ordinating to mould the vast organization into an effective homogeneous force! And in this enormous task the country's telephone network has been and will continue to be the great indispensable agent of communication.

The Bell system has enlisted every resource at its command and offered all unreservedly to the government.

This, together with the immensely increased commercial demand for service, the general shortage of materials, and the enlistment and draft of a large number of technically trained employees who cannot be replaced, will, it is hoped, be borne in mind by every loyal American if there should later result the necessity for subordinating private convenience to the pressing needs of the government.

We are not sitting idly by and waiting for a bright day when our money can buy equipment. We are using every means at our command to keep our service up to its usual high standard. You will want to help because you will be helping your own service and enabling us to do a better job for Uncle Sam.

We appreciate co-operation. CUMBERLAND TELEPHONE AND TELEGRAPH COMPANY Incorporated

G. C. MORGAN, Local Manager, Greenville, Ky.

Her Happiness and Theirs

Is assured on this outing for they brought along their Portable Victrola, and in play, at rest or when friends gather at the camp, all the good things in the Victor record library can be presented.

It is astonishing how many of us are engaged in useless occupation, when we begin to realize what is needed to win this war.

Many new records can now be found at Roark's, in Victor shipments of the week.

Prices in all lines are mounting higher, and there is a growing scarcity of goods in all lines, and such conditions will continue to grow worse.

Silent, swift, simple, strong, the White is the greatest sewing machine on the market. Full line on the floor at Roark's, and you are asked to see them.

Almost everyone now realizes that there is no business except to help win this war, and the fellow who volunteers will quickly be forced to his full share.

There is not a talking machine made which will not play Victor records, and Roark has a great supply.

Miss Nell Kennedy Cunningham, who spent her vacation with her parents, Mr. and Mrs. W. H. Kennedy, returned Saturday to Indianapolis, where she is taking a nurses training course.

Some people always get the best, others get what's left, and others get left. Select your Victrola now, at Roark's, and have delivery whenever you wish.

There are over 300 talking machines on the market, but the Victrola is first—in thought, sales, service, satisfaction. See and hear why at Roark's.

Lodge Gives Medallions to Soldiers.

Pond River Lodge No. 244, F. A. M. has had prepared a handsome medallion, to be used as a badge of identification, and has sent one to each of the ten members who is in the service of the country. The name of the member and the name and number of the lodge is impressed on the badge, and it is a certainty that everyone will be worn worthily.

Orion L. Roark returned the first of the week from Arkansas, where he attended the annual meeting of the National Editorial Association, held at Little Rock and Hot Springs, followed by a tour of a week in the State, on a special train, the journey of some 1,500 miles revealing the wonderful natural resources of the State, and everywhere the editorial party was shown the greatest courtesy, and received special attention and entertainment. Arkansas is already one of the great commonwealths of this country, and even the most enthusiastic citizen of that booster State can hardly set the mark too high as to what will be done during the next decade.

House For Sale.

A 7 room residence, on Campbell street, with outbuildings, all in good repair, for sale.

H. H. Haviland.

Don't miss the great Chautauqua program which we are having here this week.

Small rooms can be papered at half from Roark's remnants.

Many visitors are here to enjoy our Chautauqua season, always a notable event in our history.

Bought for one, enjoyed by all—that's the Victrola.

Second hand Ford Touring Car for sale. Price \$275.00. W. C. Jonson, Greenville, Ky.

Souvenirs for ladies who call at Roark's this week, but the great thing they should see is the matchless work being done by a demonstrator on the White sewing machine.

Estray Notice.

One small blue mare strayed from my place Saturday night. Any information as to whereabouts will be rewarded. Sam Elliott.

Mrs. E. N. Martin is prepared to do all kinds of ladies tailor work in best manner.

Meet Miss Lenore Loiselle, any day this week, at Roark's store, and have her demonstrate the White sewing machine and teach you how to do embroideries, Roman cut work, drawn work and Battenberg, all free of charge.

The Victrola, with many exclusive features, is supreme. A demonstration convinces. Roark will be glad to meet any test.

When so many millions of people are absolutely doing without necessities, it does seem strange that other millions cannot be curtailed in the use of luxuries.

Come and see expert demonstrator of White Sewing machines June 17 to 22. Full line machines on display.

Owing to a break in machinery, there has been a shortage of ice here during the past few days, but it is thought the trouble has been corrected, and that by careful use, our supply will be sufficient to go round.

Victrola Dominance Grows.

Victrola dominance is greater today than ever before. The latest in the field of standard machines, it quickly emerged from the rest. It has added many vital and exclusive features of construction, and has overtaken everything except demand and while the Victor Co. is annually expending millions in buildings, machinery and equipment, the world calls for more in greater degrees each year. Roark places orders many months ahead, and that is why you can place an order now and get what you wish from him.

Mayor's Proclamation.

To the Citizens of Greenville, Ky.:

Friday, June 28, 1918, is officially designated National War Savings Day by the President of the United States and the Secretary of the Treasury. All loyal citizens of this Community will accordingly devote the afternoon of said day, beginning at two o'clock, to attending the public meeting of your neighborhood and to subscribing for a specified amount of War Saving Stamps, to be purchased during the remaining months of the year.

All who are able should pledge themselves to save and invest to the limit allowed by law, and should promote the sale of this valuable Government security in large amounts during Pledge week in Kentucky, June 24 to June 28 next. C. W. Roark, Mayor

Several one room patterns of wall paper at Roark's are offered at cut prices.

Wheat harvest is about over, and the prospect for a bumper yield here is good. The total yield is estimated at over a billion bushels for the whole country.

Merchants of Greenville are wide-awake and seeking increased business. Trade with them in confident assurance of best goods at lowest prices.

Start in with the Chautauqua today, and stay with it until the end, as we have a great program, largely patriotic, and our people will get the inspiration and determination needed.

We're here to help you get the best results and the most satisfaction from your talking machine, no matter what make, and our eight years' experience is freely at your command, and should be of benefit to you. The J. L. Roark Estate.

Men without jobs, no matter how much they have, will be grabbed up and sent to war, if within the draft age, after the first of July. Uncle Sam needs all his men, and is determined to have them.

Join the large and happy family of Victrola owners. Best of the kind, beyond doubt, and nothing can give the same lasting satisfaction to the whole family, and the cost is slight.

Mrs. May Reno, who has been here on a visit to her mother, Mrs. Lucy Yost, will leave tomorrow for Louisville where she will visit her sister, Mrs. I. J. Kahn, before returning to her home in State College, Penna.

Anybody can cut prices, but no salesman can put qualities in goods not already there. That is why Victrolas, alone, of the whole talking machine family, sell at the full price, the world around.

Muhlenberg not only has men "over there" and in various training camps of this country, but has scores of men building ships, making powder, acids and all other items necessary to win the war. No matter what the call, our people have met it, fully and freely.

Most for your money in a Victrola. Cut prices show a weakness in the goods and any machine except a Victrola can be bought by anyone at a reduced price.

Job hunters are more abundant than ever known before. Not that anyone is out of work, who wants to be engaged, but those in pensional avocations are quitting them and getting into industries necessary to the prosecution of the war.

To conserve coal, in many States public schools are being run through the summer months, and will discontinue during the months of December, January and February. This does not appear to be a good arrangement and is meeting with opposition, but war measures must be carried into all our activities.

Threshermen Meet.

In response to a call issued by the government, the threshermen of Muhlenberg county met at the court house in Greenville, Ky., on Saturday June 15. Mr. Alvin Taylor was elected chairman and Mr. J. Martin Gish, Secy., after which the recommendations and regulations which follow were adopted:

1. That no threshing machine will be operated before Monday, July 1st.
2. That we do all in our power to carry out the regulations and suggestions of the government in regard to the saving of all the wheat.
3. That the price for threshing in all of the county shall be \$8 per set for 50 bushels, and under, and 10 cents per bushel for each additional bushel, except in the following boundary, beginning at Pond river, going S. E. up Noffsinger creek to Midland, thence down Cypress to Black lake, and thence down Black lake to McLean county line. North of this line the price will be \$5 per set of 50 bushels and under and 10 cents for each additional bushel, because it is much easier to transport the machinery and the crops are larger per set in this boundary. The price for oats is 6 cents per bushel and rye 15 cents per bushel.
4. Each thresherman is required to keep a record of the amount of wheat threshed, for whom threshed, date of the threshing, quality of the wheat, and what disposition is made of the crop, and report the same at the end of the threshing season to the County Food Administrator.

These four points which were fully discussed and agreed upon by the threshermen who operate in the county, all of whom were present, with the exception of one or two, who will be expected to report to the Food Administrator of this County at once and concur in these points and fill out a blank form if they expect to operate their machines.

The idea in having all begin at the same time is to eliminate some of the rush that has been caused by one man trying to get ahead of another on a crop and causing a waste of some of the wheat.

The regulations that the government ask of the threshing machine men are as follows:

1. Prevent waste of wheat and feed of wheat to farm animals by, a. Not threshing when wheat is tough, damp or unripe.
2. Reducing loss by shattering in bundle wagons.
3. Be careful to keep threshing cylinder up to speed and to properly adjust blower, teeth, etc.
4. Be careful in feeding the machine.
5. Be careful not to allow grain to leak on the ground around and under the machine, nor to be too hasty at the close of operations, to fail to clean up all of the grain from unavoidable leakages.
6. Carelessness in not raking fields and shock rows.
7. Improper adjustment of Con-caves and other parts of the separator.

These things the threshermen of this county pledged themselves to do to the best of their ability.

The meeting was attended by the Threshing Committee of the county, and was remarkable for the spirit of cooperation and patriotism shown on the part of the threshermen. It is thought that with these men operating machines and the farmers co-operation that the government need have no fear that Muhlenberg county's large wheat crop will be saved in the best possible shape and that much of the wheat which has formerly been wasted will this year be saved by patriotic men.

Every girl and woman should call at Roark's store any day this week and see and learn how to do plain and fancy sewing on the White machine. An expert demonstrator from the Cleveland factory is teaching the work, and has the most elaborate display of finished goods ever shown here. Come, and bring your friends, whether you ever intend to buy a machine or not.

Look at Roark's stock of chairs and rockers—greatest in county.

See and HEAR this \$22.50 VICTROLA at Roark's. Compare with machines of other makes at very much higher prices. And then—hear the high-price VICTROLAS!

Soldier Kills Self Here.

The town was shocked and sorrowed last Saturday morning when it was learned that Rice Eaves, son of Mr. and Mrs. Harry Eaves, had killed himself by discharging a revolver into his body. He had volunteered in the service, and for some months had been at Fort Thomas, where he was making an enviable record. He was home on a few days leave, and association with home folks and friends seemed to affect him, as he was nervous and under great mental strain. When he arose Saturday morning he went to a dresser and drew out a revolver which he placed to his breast and fired. His younger brother, Harry, Jr., was in the room, and witnessed the affair, but it was so sudden that he was powerless to prevent it, or call for help. Funeral services were held at the home Sunday afternoon, conducted by Rev. Barber, and interment was made in Evergreen Cemetery. Rice Eaves was a manly and popular young man, and his hosts of friends have the deepest sympathy with his parents and family in their grief.

Mrs. Jake Gardner, of Detroit, is here on a visit to her father, Mr. J. S. Miller, and relatives and friends.

Worm gears, with ball bearing points, the Victrola motor surpasses the bevel-gear motors in other machines to same degree it does in every other feature.

Keep That Dollar of Yours In Sight

When you spend your dollar in town you SEE WHERE IT GOES. It stays IN TOWN. It will COME BACK TO YOU in some way. When you spend it out of town it is gone, NEVER TO RETURN. You KEEP YOUR EYE on Your Dollar When You TRADE WITH THE HOME MERCHANT.

WHITE SEWING MACHINE DEMONSTRATOR ROARK'S JUNE 17-22, 1918

We have the agency for the world's most famous light running White Sewing Machine and through a special arrangement with the factory we are enabled to offer the ladies of Muhlenberg demonstrations on dates named above.

A fine line of fancy work will be shown and demonstrations and illustrations given on button holes, darning, embroidery and many other forms of sewing, all of which can be done on this famous White Sewing Machine without extra attachments.

More than six million White Sewing Machines are in use and more are being sold today than any other two machines on the market. The White is the only sewing machine with tension indicated by number instead of by guess, which is only one of a great number of its advantages over all other machines.

Doing your own sewing instead of buying garments already made is a patriotic conservation and will save you at least two thirds on your wearing apparel.

ROAD BUILDING

NATION-WIDE BOOST IS SEEN

All States of Union Have Availed Themselves of Opportunity Offered by Government.

(Prepared by the United States Department of Agriculture.)

That the better roads movement is receiving a nation-wide boost is shown by the fact that all the states of the Union have availed themselves of the opportunity of participating in the benefits of the federal aid road act, which appropriated \$75,000,000 for the construction of past roads and \$10,000,000 for forest roads, according to the report of the director of the office of public roads and rural engineering, United States department of agriculture. That the passage of the act has stimulated road building is shown by the fact that in 1916, there were approximately \$10,000,000 of state funds expended for all highway purposes, and it is estimated that in the calendar year 1917, the aggregate expenditures of state funds for this purpose will be at least \$60,000,000. A number of the states have made specific appropriations to meet federal aid dollar for dollar. Among these are New York, Illinois, Michigan, Rhode Island, Nevada, Iowa, Florida and Vermont.

BUILD ROAD CULVERTS RIGHT

Waste of Time and Money Unless Work Is Done on Approved Plan Under Competent Direction.

No culvert that is improperly built is safe or economical. On the contrary, it is a waste of money to spend it on such work unless the work is well done on an approved plan under competent direction. There must be

Low Water Concrete Bridge.

calculation as to the volume of water the culverts are to carry off in rainy season and flood time, not in dry weather, and as to the durability of the material used in their construction. There can be no skimping on culverts or bridges or drainage without waste. It is better to have these three things permanent and adequate than to have an expensive form of road surfacing if a choice must be made. The man who built his house on shifting sand instead of solid rock has been regarded for centuries as the prince of fools.

AUTOMOBILE IS BIG FACTOR

Present War Has Found in Roads and Motor Cars Means of Moving Great Numbers of Men.

Two conditions of civic life emphasize the necessity for good roads. One is war. The Roman roads were built because Rome had vast armies to move. The present European war has kept thousands upon thousands of men busy in eastern Prussia and western Poland building roads in territories where before there were only swampy trails. Many of the roads in Belgium and northern France were built during previous wars, when vast armies must be moved quickly, so that the present war has found in roads and motorcars the means of moving great numbers of men.

IMPORTANCE OF ROAD DRAGS

More to the Work Than Standing on Implement Holding Reins Over Team of Horses.

Perhaps the ease of dragging the road and the simplicity of the King road drag has been overemphasized. At any rate, there is more to road dragging than standing on a drag and holding the reins over a team of horses. And there is more to drag building than merely pulling together at the two ends of a split log. On the other hand, almost any sort of driving down the road with the roughest possible pair of shafts, shipped together in any old way, will change the ordinary road for the better.

Concrete Culverts Best.

Concrete culverts are, without doubt, the best to use in point of durability and cost of maintenance. There are several reinforced and plain concrete pipes manufactured in great quantities which make very satisfactory culverts.

Don't Disturb Sow.

After farrowing the sow should not be disturbed, and if she lies quietly for 10 or 12 hours, so much the better. When she wants anything she will go to the trough for it.

Roark's Greenville, Ky.

DAIRY FACTS

JERSEY IS HEAVY PRODUCER

Milk Scales and Butterfat Test Determine Whether Cow Is Producing Profitably or Not.

The milk scales and the butterfat test tell the story of whether a cow is producing or not. Jerseys have been making and breaking records for production with great rapidity during the past year. More cows are now being tested than ever have been in the past, and the individual and average production is higher than in other years.

In May, three years ago, a list of Jersey cows on yearly test that were

Jersey Cow of Merit.

producing over 50 pounds of butterfat per month was published for the purpose of keeping breeders informed as to the month-by-month production of cows on test. There were 132 cows in the first list. Three years later, May, 1917, saw 487 cows in the 50-pound list. This means that 487 Jersey cows on test were producing at the rate of more than 50 pounds of butterfat, or 60 pounds of butter in that month. At present 500 Jersey cows on test are producing at the rate of 600 pounds of butterfat, or 750 pounds of butter per year.

TREATMENT OF KICKING COW

Care and Patience Will Effect Cure if Right Methods Are Used—Two Ways of Tying.

Care and patience will cure the kicking cow if the proper methods are employed. One method is to pass a rope or strap with a loop in one end of it around the body of the cow and draw it tight. The cow will usually jump at first, but when she finds she cannot get out of the rope she will stand still. If this method causes the cow to give bloody milk, place the rope or strap behind the udder, and draw it tight as before.

Another method is to hobble the cow by passing the rope around each leg behind the udder, and tying just above the hocks. This method is a dangerous one, however, for the person tying the rope. After these methods have been repeated a few times the cow will stand quietly to be milked.

DAIRY IS A FIXED INDUSTRY

Where That Feeling Exists There Is Disposition to Raise Heifers or "Baby Beef."

The farm dairy is becoming more of a fixed industry, and where this feeling exists there is a disposition to raise the calves—the heifers for the dairy or to be sold for dairy purposes, and the better calves will generally be fed into some form of baby beef as the feed and circumstances suggest.

WARM WATER MUCH CHEAPER

Otherwise Cow Must Burn High-Priced Corn and Other Feeds for That Purpose.

If the cows are forced to drink cold water they must warm the water in their bodies. This requires food in the form of corn and other feeds. It is much cheaper to warm the water with wood or coal than to allow the cow to burn high priced feed in her body for this purpose.

SHORTHORNS GOOD FOR MILK

There Are Some That Are Excellent Producers, but They Are Not of the Beef Type.

A back-to-the-lander wants to know about the Shorthorns as milk producers. There are some dairy Shorthorns that are excellent milk and butter animals. But one can no more make a dairy animal of the beef type Shorthorn than make a trotter out of a Belgium horse.

Raise More Calves.

The farmer and dairyman who expects to continue in the business will find it to his interest to raise a number of calves each year to replace older cattle that have been disposed of.

Feeding Doubly Useful.

Use sufficient straw for bedding to make the animals comfortable and to absorb the liquid excrement. Nearly half the phosphorus elements in animal manure occurs in the urine.

THE MISSES KELLER CONCERT COMPANY

The Misses Keller are experienced concert musicians. For several seasons they toured the larger cities of the South and were recognized as competent interpreters of the best in music. Miss Lou Alice Keller presents original compositions in both piano and voice. They are able to please any music loving audience and will maintain the standards of the most exacting critics. These splendid artists are on the Chautauqua program.

RITA RICH AND LAURA WERNO

"JUST US"

These charming young ladies were with the Killarney Girls for four years and are versed in the art of entertainment. Their program consists of readings, pianologs, character songs, duets and child songs and stories. An interesting feature is their English and Irish costume impersonations. They will appear at our Chautauqua.

THE LINCOLN YOUTHS' CHAUTAUQUA

Dear Girls and Boys:

Did you know that you are going to have a Chautauqua all your own this year? The Junior Supervisor is coming to stay with you for a whole week before the adult Chautauqua starts. You will play games, run races, and go on hikes, and on the fifth night you will have a big parade and play festival. Then the supervisor is going to tell you some fine stories and you will have such a good time. A college man with the tent crew will give special attention to the boys' athletics during the regular Chautauqua week.

You are going to be on the program of the Big Chautauqua; just think of that! We are giving a play this year called "Columbia's Awakening" and we want all the boys and girls in your town to take part. It is a patriotic play especially emphasizing Thrift, Good Fairy Thrift, Martha and George Washington, Uncle Sam and Miss Columbia and many other characters will be represented by the young people of your community.

This is your play and will be given the opening night of the adult Chautauqua. The Junior Supervisor will tell you all about it when she arrives and will help you make a big success of it. You will have a chance to sell season tickets and the supervisor will co-operate with you in putting on a campaign for the sale of Thrift Stamps.

The Lincoln Youths' Chautauqua has been growing more popular each year and now you can prove to your fathers and mothers that you can make a success not only of your Chautauqua, but help them make a success of theirs, and at the same time be doing your bit, every one of you, for Uncle Sam in helping Win the War. You have a wonderful opportunity and I know I am going to be proud of the success achieved by you and your Junior Supervisor.

Youths' season tickets \$ to 15 years, inclusive, will be \$1.00 and above. Buy your ticket early and three years parents and friends to do the same. Ask the supervisor to tell you how you can earn the money to buy your own ticket. She will be glad to help you in every way possible.

Now, remember, you are going to have two full weeks of good times and I want you to be right on hand the day your supervisor arrives so as to not miss anything; meet her at the train if you possibly can and give her a royal welcome. Show her that you live in a live town and that you boys and girls are wide awake. If you want to know anything more about your Chautauqua I will be glad to have you write me.

Yours for a big success, MYNNE E. GORDON, Director of Lincoln Youths' Chautauqua.

R oark, Greenville, Ky.

STYLE XVI VICTROLA, \$225

The Aristocrat of the Victor Family

Its very appearance suggests culture and refinement—the kind of instrument you are proud to have in

your home—to have your friends see—that brings you prestige and their respect.

To appreciate its individuality and wonderful tone reproducing qualities it must be seen and heard in comparison with all other models. Artistic—made from choiciest woods—beautifully finished—

it enters the finest homes to delight and entertain. To own one is to know complete satisfaction.

VICTROLAS, RECORDS, CABINETS, SUPPLIES

The J. L. ROARK ESTATE
GREENVILLE, KENTUCKY

The Victrola is a good friend of the invalid

If the Victrola did nothing more than help to pass the time, it would still be worth while in the sick room.

But it does more than that—it cheers the invalid and helps toward a more rapid recovery.

The portable sizes of the Victrola are to be had at \$15, \$25, \$40, \$50; the cabinet styles from \$75 to \$100. Easy terms can be arranged if desired.

Stop in and we'll gladly demonstrate the Victrola and play any music you wish to hear.

LIVER DIDN'T ACT DIGESTION WAS BAD

Says 65 year Old Kentucky Lady, Who Tells How She Was Relieved After a Few Doses of Black-Draught.

Meadersville, Ky.—Mrs. Cynthia

Higginbotham, of this town, says: "At my age, which is 65, the liver does not act so well as when young. A few years ago, my stomach was all out of fix. I was constipated, my liver didn't act. My digestion was bad, and it took so little to upset me. My appetite was gone. I was very weak. I decided I would give Black-Draught a thorough trial as I knew it was highly recommended for this trouble. I began taking it. I felt better after a few doses. My appetite improved and I became stronger. My bowels acted naturally and the least trouble was soon righted with a few

doses of Black-Draught."

Seventy years of successful use has made Thedford's Black-Draught a standard, household remedy. Every member of every family, at times, need the help that Black-Draught can give in cleansing the system and relieving the troubles that come from constipation, indigestion, lazy liver, etc. You cannot keep well unless your stomach, liver and bowels are in good working order. Keep them that way. Try Black-Draught. It acts promptly, gently and in a natural way. If you feel sluggish, take a dose tonight. You will feel fresh tomorrow. Price 25c. a package—One cent a dose. All druggists.

Eat Cornbread.
